

FIRMWARE UPDATE RELEASE NOTE: **PM130P/EH PLUS**

Date: 12/11/2009

Version: V11.1.11

New Features:

1. Added Enfora GSM1308 GPRS PAD communications support.
2. Added GPRS setup.
3. Added RSSI and GPRS status registers and communication counters.
4. Added TCP event notification client.
5. Allowed TOU option without a TOU module.
6. Added time triggers.
7. Added DI change event log for 5 recent events.

Bugs Fixed:

1. RT (one-cycle) kW imp/exp and kvar imp/exp registers were not updated.
2. 15-sec display scroll interval was not operational.
3. The RTC module's DIs were not reported via communications.
