

Energy Management System (EMS) Comprehensive Power Quality Analysis Customer Billing and Invoicing

## expertpower™) at a Glance

ExpertPower<sup>™</sup> software solution provides comprehensive energy management and micro SCADA capabilities for a wide variety of purposes such as: sub-metering, billing, meter data management, energy efficiency, demand response, power quality analysis, independent power producer core processes and generator control. ExpertPower<sup>™</sup> is available either as an on-line cloud service (Service Edition) or as a stand-alone on premise package (Pro Edition).

SATEC's complete versatile solution includes our wide range of analyzers combined with ExpertPower<sup>™</sup> software, offering information and analytics to improve the efficiency, reliability, security and profitability of our customers' energy system. ExpertPower<sup>™</sup> uses a standard web browser as user interface, for both local installations and Internet remote installations. This reduces the total cost of ownership (TCO) by eliminating the need for training and special client hardware and software. With ExpertPower<sup>™</sup> Service, there is no need for server hardware and software or on-site IT experts.

With installations of over 40,000 managed devices at one site, ExpertPower™ is the most powerful energy management solution on the market. Its scalability allows you to start with small installations and to expand as your business grows.

# Main Features

## Data Collection

- Automatic data collection from energy meters (electricity, water, gas etc.), power quality analyzers and substation automation controllers
- Complex calculations from two or more devices
- Easy configuration of new devices, communication server and register mapping

### Presentation

- View all data in your browser—no software installation, no employee training
- Customized dashboards, single line diagrams with real time data, graphs with status indications (color, icon)
- Multi-user, multi-security levels
- GeoLocation—positions your metering points on the map, providing geographic navigation and grouped alert monitoring
- Lobby Application—customizable full screen kiosk mode showing consumption over time, energy saving competition, weather forecast and more

## Historical infor mation

- All data is logged in the database
- Chart any measured parameters
- Monitors trends to identify potential problems

### Reports

- Manual, automatic or scheduled reports
- Preconfigured or customized reports
- HTML, export to MS Excel and PDF formats

## Alarms and Events

- Multi-level thresholds for complex criteria
- Messaging, emails and SMS alarms
- Logs all alarms
- Requests user acknowledgement

## Connectivity & Interoperability

- Integrate all energy management, automation system and billing into one web based system
- Built-in data export to different formats (Excel, PDF, CSV etc.)
- Standard RESTful Web service API and IEC 60870-5-104 interfaces allow for easy integration with third party enterprise applications such as BMS, SCADA, ERP, CRM and Accounting

## Architecture

- Complete web based design with multi-browser support
- Grow as you go architecture—from single device to tens of thousands
- Distributed servers—support for server virtualization technologies such as VMWare
- Local or remote MS-SQL database
- Supports express, standard and enterprise MS SQL editions

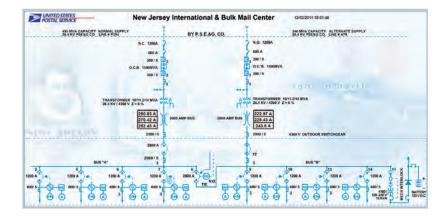

## Energy Management & Power Monitoring

Allows you to monitor your power and energy consumption in complex sites.

- Collects data from SATEC and other products over Modbus, BacNet, DLMS and SNMP protocols
- Graphic or geographic maps, icons and color status indicators
- Virtual devices—real time calculations such as summation, subtraction and more
- Historical data, trends and detection for identifying unnecessary load operation
- Advanced comparison wizard— select multiple devices, parameters and time periods

#### SINGLE LINE DIAGRAM

With real time date updates

#### **EXECUTIVE DASHBOARD**

Fully user-editable customized dashboards for each user

# Billing & Subtenants

Enables monitoring the consumption of sub-tenants and managing the billing process.

- Dynamic tariff settings including prices, usage and seasons
- Accurate cost calculation
- Complete submetering solution
- Tenant management
- Flexible invoicing options
- Invoice comparison

#### **ENERGY BILL**

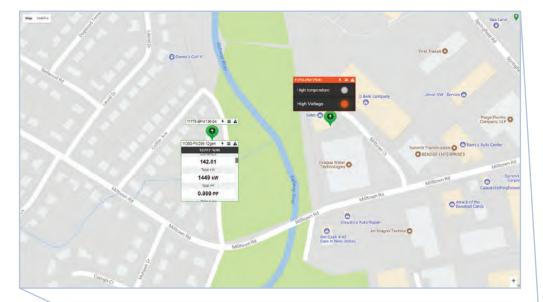

# Power Quality

DETAILED EVENT ANALYSIS

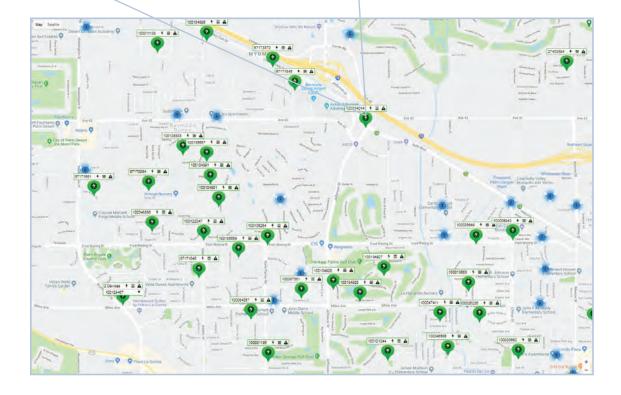

# Demand Response & Smart Grid

- Automatic and manual operation of generators to reduce peak demand according to schedule, incentives and availability
- Power station load management, production tracking and consumption monitoring, allowing detection of consumption irregularities and anomalies
- Control of substation automation bay controllers

#### GEOLOCATION

ExpertPower™ GeoLocation Dashboard allows for geographical meter display, alert notification and navigation on a map or satellite view.

# **IPP Power Plant Management**

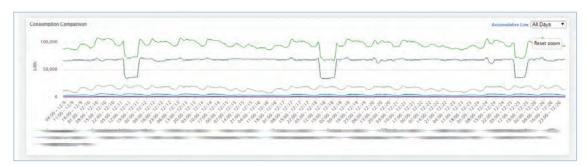

- Generates daily production plans based on different algorithms, send/get daily production data from a CDC (Central Dispatch Center)
- Predicts customer consumption
- Manages power plant statuses such as: availability, startup duration and interruptions
- Issues gas orders
- Generates energy and cost balance calculations based on import & export energy, operational parameters, plant statuses and different tariffs
- Complete billing solution for electric power and related thermal products, including invoicing and a large set of configurable reports and tariffs

# Tenant Mobile Application

- Supported on both iphones and androids
- Monitor monthly/daily/hourly cost
- Notifications about excessive usage and a high predicted monthly bill
- Look around to compare my normalized consumption with other tenants
- View past invoices

#### 

## Applications & Case Studies

### Commercial

Commercial Buildings | Shopping Centers

Universities | Hospitals | Hotels

### Chain Stores | Residential Buildings

#### **ENERGY EFFICIENCY & COSTS**

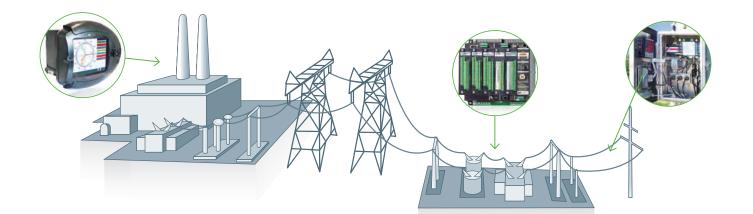

- Reduce energy consumption
- Reduce surcharges and penalties (power factor, peak demand, etc.)
- Initiate corporate level saving plans
- Increase green star rating

#### **SUBMETERING & BILLING**

- Comprehensive billing solution for energy retailing (electrical, water, gas and air condition) to sub-tenants
- Web access for tenants, to view their bills and on-line data

#### POWER RELIABILITY

- Proactive maintenance for maximum system availability
- Analyze demands to help utilize existing infrastructure and prevent overdesign

### Utilities | Smart Grid | Renewable

Generation | Power Plants

Transmission | Distribution | Smart Grid

Renewable: Solar | Wind | Waste Water

#### SMART GRID

- AMR/AMI complete solution including billing
- Comprehensive substation automation
- Monitor and reduce energy losses

#### **POWER QUALITY**

 Analyze source of power quality issues to allow isolation  Manage customers' power quality

#### NETWORK SECURITY

- Proactive maintenance for maximum system availability
- Analyze demands to help utilize existing infrastructure and prevent overdesign

### Data Centers ENERGY EFFICIENCY & COSTS

- Reduce energy consumption
- Reduce surcharges and penalties (power factor, peak demand, etc.)
- Initiate corporate level saving plans

#### SUBMETERING AND BILLING

 Comprehensive, highresolution billing solution for retailing energy to customers, down to an individual electric cabinet or even individual computer

- Web access for customers to view their bills and online data
- Power reliability
- Proactive maintenance for maximum system availability
- Analyze demands to help utilize existing infrastructure and prevent over design

Process Industry Semi-Conductors Pharmaceutical Process Industry Mining

Industrial

iviii iii ig

Automotive

#### **ENERGY EFFICIENCY & COSTS**

- Reduce energy consumption
- Reduce surcharges and penalties (power factor, peak demand etc.)
- Initiate corporate level saving plans

#### POWER RELIABILITY

- Proactive maintenance for maximum system availability
- Analyze demands to help utilizie existing infrastructure and prevent over-design

#### **POWER QUALITY**

- Effectively monitor power quality to prevent failures
- Verify the quality of the supplied voltage
- Generates compliance reports in accordance with international and local regulation
